ADVANCED COURSE with HANDs ON

Designed in a way to maximise your learning experience with both interactive learning hands-on sessions and lectures, We present to you an Intensive 2 days advanced course that will focus on the secrets of Macro, Mini and Micro aesthetics which guarantee a beautiful smile and face at the end of DAMON SYSTEM treatment, Integrating high end technology with professional orthodontic protocols, and all the tricks you need to know and practice to be one of the TOP-10 Orthodontists in your Country.

One of our strong beliefs is that "WE BELIEVE EVERY PATIENT IN OUR PRACTICE IS A CELEBRITY", this is a rule that we live by in **BORGANODONTICS** and we take that very seriously.

In order to do that we had to take a lot of measures and tried many things and finally came with our specific protocols, tips and tricks to maximise the facial aesthetics during any orthodontic treatment until we reached a phase where the patient says: "WOW ... I only thought you are going to get my teeth up and straight !!

If you want to become a master of what you do you should master the facial aesthetics and become an **ARTIST ORTHODONTIST**.

How can you do that?? Join me in my **ADVANCED COURSE**.

DAMON ADVANCED COURSE with HANDs ON

Dr. Bader Borgan,

BDS(Jordan), MSc (Cairo), MOrth RCS (Ed.)
Consultant Orthodontist

Dr.Borgan received his dental degree from the University of Jordan in 1994, which was shortly followed by a master of orthodontics from Cairo university and a fellowship

from the Royal College of Surgeons in UK.

In addition to his orthodontic practice in JORDAN, Dr.Borgan moved with his family in 2015 to Cambridge - UK, where he founded his Academy. Dr.Borgan is a key opinion leader in the region of EMEAI (Europe, Middle East, Africa & India) for Ormco.

He is part of the R&D team for Insignia, where recently Insignia has applied his modification in the design of the system.

Dr.Borgan loves to share his passion towards creating beautiful smiles and faces, he believes that using the most advanced technology in diagnosis and treatment can produce beautiful smiles without removing teeth or major surgeries.
